## Regulated Chemical Substance specification (2024)

Foxconn Industrial Internet Co.,Ltd.(Hereinafter referred to as: Fii) has formulated internal control standards and management processes for chemical substances, implemented hierarchical control over the chemical substances contained in the designed and manufactured products, through in management of R&D, procurement, quality management and other processes. We cooperate with suppliers, partners and other stakeholders to make products comply with relevant laws, regulations and customer requirements, and reduce the impact of hazardous substances on human health and the environment.

This document describes Fii's specifications for prohibiting, restricting, and reporting certain chemical compounds/materials/substances in Fii's products or manufacturing processes.

This revision of the specification applies to all parts and materials that are purchased by Fii & its subsidiaries and used in Fii products, effective May 01, 2024

Fii must guarantee environmental compliance for all materials, parts, products and Packaging, and materials used during the manufacture of the parts, products and Packaging for Fii.

Information on environmental compliance allows Fii to:

- 1.Satisfy legal and regulatory requirements;
- 2.Drive improvements in product design; and
- 3.Respond to inquiries from customers, product recyclers and other stakeholders.

The restricted substances listed in this specification are not an exhaustive list of all chemicals of concern at present. Fii and its suppliers should take steps to understand the human health and environmental impacts of all chemicals used in manufacturing and in parts and materials currently supplied to Fii. Fii and its suppliers should be drive to reduce or avoid the use of chemicals of concern listed in this table and comply with all applicable regulations.

In addition to this, there are some chemicals that need to be managed due to other reasons such as quality, safety and human rights (eg: conflict minerals, red phosphorus, etc.)

In some cases, we may request an individual investigation (for example: a request for an investigation or a statement in the specification)

**Table1, Restricted Substances in Parts/Materials and/or Production Process Parts/Materials(Base on IEC62474DB)**

Restrictions in Section 3 apply to all homogeneous materials used in Apple products, accessories, and packaging. Restrictions also apply to all homogeneous materials applied to or cured onto parts in Apple products, accessories, and packaging. This includes adhesives, inks, coatings, primers, and other wet formulations manufactured by the material manufacturer in addition to the cured materials in the finished good. In certain cases, the scope may be more limited, which is indicated in the table below. Otherwise, if "All materials" is indicated in the scope, the general restriction scope applies.

No.	Specific Substance	CAS No.	Applications	Threshold	Basis Description	Basis
1	Diarsenic pentoxide(As <sub>2</sub> O <sub>5</sub> )	1303-28-2	All	0.1 mass% of article	[EU] REACH Regulation (EC) No.1907/2006 Candidate List for	Regulated
2	Diarsenic trioxide(As <sub>2</sub> O <sub>3</sub> )	1327-53-3	All	0.1 mass% of article	[EU] REACH Regulation (EC) No.1907/2006 Candidate List for	Regulated

## Table2. Restricted Substance in Manufacturing Processes

Restrictions in Table 2 apply to manufacturing process chemicals used to create components or materials for Apple products and the assembly of Apple products including: direct use during production or indirect use for manufacturing equipment, machines, or tools during maintenance. Fii and its suppliers must comply with threshold limits for the chemicals listed in this section. Per the Fii SER code of conduct, Fii and its suppliers shall identify, evaluate, and manage occupational health and safety hazards through a prioritized process of hazard elimination, engineering controls, and/or administrative controls, also shall provide their employees with suitable job-related, appropriately maintained personal protective equipment and instruction on its proper use.

### Table3, Reportable substances and Phase-out plan

Fii continues to report on the use of the substances listed in Section 7 in its manufacture and in any manufacturing process of product components or materials. Fii is prioritizing the chemicals it intends to phase out from Fii's manufacturing process in order to work effectively with its supply chain.
